

Why Have My Windows 7 Devices Stopped Patching in Automox?

Last Modified on 10/12/2020 12:52 am EDT

The discontinuation of Windows 7 OS patch deployment means you will stop seeing new patches every month. Third-party patches, required software, and Worklets will continue to apply and be relevant, provided they continue support for Windows 7.

If your organization has a need to continue using Windows 7, Microsoft offers Extended Security Updates on a per device cost. For more information, see their FAQ: <https://support.microsoft.com/en-us/help/4527878/faq-about-extended-security-updates-for-windows-7>
