

Week in Review - Release Notes for Week Ending 12/11/2020

Last Modified on 12/22/2020 11:44 pm EST

Enhancements:

The updated design of the Software Page is reflected in our documentation here:

- [Viewing the Software Inventory](#)
- [Filtering and Searching on the Software Page](#)
- [Adding Patches to the Block List in the Automox Console](#)

Important Updates:

Version 30 of the Automox Agent is available and offers support for Mac Big Sur as well as security upgrades. See the following:

- [Silent Agent Deployment on Windows](#)
- [Deploying the Automox Agent Using Windows GPO - for Remote Users](#)

Changes to Oracle SE Java 8 mean Automox can no longer support patching that title. More information on the impact of this for Automox users can be found here:

[Oracle SE Java 8 Support Shift and How It Impacts Automox Users](#)
