

# Week in Review - Release Notes for Week Ending 8/07/2020

## Bug Fixes

- Pressing Enter in the Create Organization form will create organization with name specified. (8/04)
- Newly created policies will now show as 'Pending' on affiliated devices before first evaluation. (8/05)
- Duplicate records for servers will no longer be created if a previously removed server is re-added for an organization. (8/07)

## Enhancements

- Groups will now appear in alphabetical order in dialog, and hierarchical and then alphabetical order in the system management page. (8/03)
- A new API Key management feature has been added within the Settings page that allows administrators to issue, delete, and generate new API keys for whatever purposes you need. (8/06)

Detailed documentation for this enhancement:

New:

List all keys for an organization - [get/orgs/{orgid}/api\\_keys](#)

List API keys for a user - [get/users/{userid}/api\\_keys](#)

Create an API key - [post/users/{userid}/api\\_keys](#)

View an API key - [get/users/{userid}/api\\_keys/{id}](#)

Update an API key - [put/users/{userid}/api\\_keys/{id}](#)

Decrypt an API key - [post/users/{userid}/api\\_keys/{id}/decrypt](#)

Delete an API key - [delete/users/{userid}/api\\_keys/{id}](#)
