

Week in Review - Release Notes for Week Ending 7/10/2020

Last Modified on 12/18/2020 8:40 pm EST

Bugs

- Resolved a device fingerprint bug that would occasionally create duplicate Devices entries for a virtual device after the agent was reinstalled. (7/10)
- Fixed a versioning issue with /XnView MP. (7/10)

Enhancements

- Setting a device limit on an organization with child organizations now enforces the device limits across all of their child organizations. (7/6)
-
