Week in Review - Release Notes for Week Ending
7/3/2020

Last Modified on 12/18/2020 8:42 pm EST

Bug Fixes:

- Fixed issue where successfully patching Evernote using a Worklets policy was misreported as failing in the Activity Log (6/30).
- Fixed an issue where Office365 would detect an incorrect latest version and cause the update to fail. (7/1)
- Fixed an issue where conflicting Office365 update channel settings set by different methods could cause inconsistent detection of the latest version during the update process. (7/1)

Enhancements:

- Added support for new Office365 update channel "Monthly Enterprise". (7/1)
- Setting a device limit on an organization with child organizations now enforces the device limits across all of their child organizations. (7/2)
- It is now possible to link an existing Automox account with a CrowdStrike account through the CrowdStrike Store. (7/2)
- Prohibit inclusion of '$*<>{/}' in group names and limit group names to 45 characters. (7/2)
