

2020.05.06-01 Release Notes

Last Modified on 12/18/2020 8:58 pm EST

Minor front end enhancements and bug fix

Bug Fix:

- Fixes a problem where Internet Explorer was being directed to /undefined/ in the URL

Enhancements:

- Added color theming for date-pickers in the app. Date-pickers are now dark/light in accordance with parent page themes
 - Added expiration headers to improve caching performance
 - Changed label in advanced polices so as to not lead users to think we had access to apple app store
 - Page no longer loads before login page is displayed when user is not authenticated
-
