

2020.03.31-01 Release Notes

Last Modified on 12/18/2020 9:50 pm EST

Bug fixes and new third party support for Microsoft OneDrive and Wireshark on both macOS and Windows, and Zoom Outlook Plugin for Windows

Bug Fixes:

- Removed ability to edit email address from SAML users
- Fixed the invite link in the email that invites others to join a given organization
- Running Chrome instance no longer fails when Chrome is upgraded on Mac
- Harmonized device statuses across the console so that all device statuses are consistent

Enhancements:

- New third party patching support for Microsoft OneDrive on macOS and Windows
 - New third party patching support for Zoom Outlook Plugin on Windows
 - New third party patching support for Wireshark on macOS and Windows
-
