

System Management Overview

When you select the **Manage** tab in the console, you will see our System Management overview page. This consists of Policy Management, Tasks, Group Management, and our Worklet Catalog.

Learn how to create and enforce policies across devices, and organize those devices into groups. For information about using Tasks for vulnerability sync, refer to [About Automox Vulnerability Sync](#).

The following topic are described here:

- [Viewing an individual Policy or Group](#)
- [Managing Policy and Group Assignments](#)
- [Determining Which Policies are Assigned to Which Group](#)
- [Searching and Filtering for an Individual Policy or Group](#)
- [Managing Groups](#)
- [Managing Policies](#)
 - [Creating a Patch Policy](#)
 - [Creating a Required Software Policy](#)
 - [Creating a Worklet](#)
- [Setting a Patching Schedule](#)
- [Device Targeting with Filters](#)
