

# Searching and Filtering for an Individual Policy or Group

From the **Manage > Policies** or **Manage > Groups** page, you can use the search bars on the Policy or Groups pages to find an individual policy or group.

- From the Policies or Groups page, enter the name of the policy or group into the corresponding filter search bar.
- If your Policy or Group does not have any devices associated with it, it will be classified as an **Unused Policy** or **Unused Group**. By turning on this toggle, you will filter the list to only show the Unused Policies or Unused Groups.
