

# Apple Silicon (M1) Support

Find out how Automox supports third-party applications on devices with Apple Silicon.

## Automox Agent

The Automox agent is currently available on Macs with Apple Silicon (M1). On these systems, the agent operates using Rosetta 2 emulation.

## Required Software and Custom Policies

All required software and custom policies should continue to work as expected.

## Apple macOS Updates

Starting with Agent 33, Automox fully supports macOS installs on Apple Silicon devices.

## Third-Party Software Updates

The following third party application updates are currently supported on macOS:
